

ATLANTIS

THE AGENTIC DISCOVERY LAYER FOR SUI

SUI OVERFLOW 2026

WALRUS TRACK

LIVE: MAMIWATER.VERCEL.APP

COMPANY PURPOSE

ATLANTIS gives every Sui user a personal AI agent that remembers them — and every dApp a verifiable on-chain reputation written by specialist agents.

PROBLEM

DISCOVERY ON SUI IS BROKEN TWICE OVER.

For users: hundreds of dApps, no trustworthy filter. Reviews are gameable, metrics lie, "trending" usually means "loudest." Rug pulls keep arriving at the front door.

For agents: AI assistants forget you the moment you close the tab. No persistence, no accountability, no shared memory between tools.

Today's workaround: Twitter alpha, Discord shilling, gameable star ratings, word-of-mouth.

THE COST

Users get rugged. Good builders go undiscovered. Ecosystem volume stays bottlenecked on noise.

SOLUTION

PERSISTENT AGENTS. VERIFIABLE MEMORY. ON-CHAIN RECEIPTS.

Four specialists audit each dApp. Findings go to Walrus, pointers go on-chain. A personal agent in MemWal remembers you and ranks recommendations against your wallet history.

SPECIALISTS — READ ON-CHAIN STATE, WRITE FINDINGS TO WALRUS, SHARE NOTES VIA MEMWAL SCRATCHPAD

SECURITY

Move audit · caps

TOKENOMICS

Supply · flows

UX

Site · docs · clarity

METRICS

TVL · users · activity

SUMMARIZER

Consensus verdict · Walrus blob · on-chain AgentReport

PERSONAL AGENT

Reads your wallet · stores profile in MemWal · ranks recs · warns on risk

WHY NOW

DISCOVERY HAS BEEN A 12-YEAR STAIRCASE. STEP FOUR JUST UNLOCKED.

2013 · DIRECTORIES

→

2020 · METRICS

→

2022 · SOCIAL

→

2025 · AGENTS

LLM TOOL-USE MATURED

Multi-turn agents with structured outputs are finally production-grade (2024).

WALRUS + MEMWAL SHIPPED

First decentralized, verifiable memory layer purpose-built for AI agents (2025).

SUI HIT CRITICAL MASS

Hundreds of dApps, real TVL, users now *expect* AI assistants — not directories.

MARKET SIZE

SUI-FIRST. BUT THE PATTERN WORKS ANYWHERE ON-CHAIN.

Primary customer: Sui-native traders and builders. Spillover: anyone evaluating any on-chain protocol on any chain.

580M+

TAM · TOP-DOWN

Global crypto users. AI-assistant market projected \$50B+ by 2030.

~1.5M

SAM · BOTTOMS-UP

Monthly active Sui wallets across 100s of indexed dApps.

\$540K

SOM · YEAR-1 ARR

10% of Sui MAU on personal-agent freemium @ \$3/mo. Excludes B2B + referrals.

COMPETITION

EVERYONE HAS DATA. NO ONE HAS VERIFIABLE MEMORY.

PLAYER	ON-CHAIN REPORTS	PERSISTENT MEMORY	SUI-NATIVE
DefiLlama· data & metrics	X	X	X
Token Terminal· fundamentals	X	X	X
Sui Apps Directory· curated list	X	X	✓
Generic AI assistants· chat + browse	X	session	X
ATLANTIS· agentic discovery	✓	✓	✓

Moat: every agent run is a frozen on-chain object pointing to a content-addressed Walrus blob. The receipts are the product.

ALREADY SHIPPING. ALREADY ON WALRUS.

LIVE TODAY

- dApp registry on Sui (100s indexed)
- On-chain reviews + comments (Walrus-backed)
- Enoki gasless + zkLogin social auth
- Sui Wrapped 2025 NFT pipeline
- Blockberry + on-chain metrics fusion
- Production frontend at mamiwater.vercel.app

SHIPPING FOR OVERFLOW • 6 WEEKS

- agent_reports Move module (verifiable reports)
- Four specialist agents + summarizer
- Personal agent with MemWal-backed profile
- Memory inspector UI (users own their memory)
- Referral + tip Move modules (tx layer)
- Conversational chat with the personal agent

Roadmap beyond hackathon: per-agent zkLogin identities → mainnet deploy → 10+ partner dApps in referral program → mobile/PWA → agent marketplace.

BUSINESS MODEL

EVERY LAYER PAYS IN SUI ON SUI.

1

PAY-PER-EVALUATION • B2B

dApp devs pay ~0.5 SUI for priority re-eval, expanded specialists, or competitor alerts.

ACV \$50-500 / DAPP / YR

2

PERSONAL-AGENT FREEMIUM • B2C

Free 5 recs/day. Premium \$3-5/mo in SUI for unlimited recs, memory export, alerts, chat.

ACV \$36-60 / USER / YR

3

TIP THE AGENTS

Users tip the specialist whose report saved them.
Routes to per-agent treasury — also a public trust signal.

VOLUNTARY • SIGNAL

4

CONVERSION-DRIVEN REFERRALS

Partner dApps pay X bps when an ATLANTIS-referred user transacts on their package within 24h. Verified on-chain. We're *directly* aligned with Sui volume growth.

ECOSYSTEM ALIGNED

TEAM

BUILDERS, NOT PITCHERS.

Eben

FOUNDER • FULL-
STACK • SUI/MOVE

Leads product and the end-to-end build — Sui/Move contracts through to the live frontend.

Ifrenzy

CO-FOUNDER • SMART
CONTRACTS (MOVE)

Owens the Move layer — dApp registry, reviews, and the agent_reports module.

Issac

AGENTS & BACKEND •
AI

Builds the multi-agent runtime and the Walrus + MemWal verifiable-memory layer.

SIG

FRONTEND & PRODUCT
DESIGN

Crafts the neobrutalist UI, discovery feed, and wallet onboarding experience.

Open post-hackathon roles: agent/ML engineer • BD lead (partner dApp onboarding). Advisors: Walrus / Sui ecosystem.

LEAN TO SHIP. ALIGNED WITH ECOSYSTEM VOLUME.

COST STRUCTURE • HACKATHON WINDOW

- ▶ LLM (Anthropic): ~\$50 total
- ▶ Hosting (Render): \$0 free tier → \$7/mo
- ▶ Walrus storage: negligible (epoch-based)
- ▶ Sui gas: minimal, sponsored via Enoki

MILESTONES

- ▶ Jun 21 — submission, full loop live on testnet
- ▶ Aug 27 — winners announced
- ▶ Q3 2026 — mainnet → 100% prize unlocked
- ▶ Q4 2026 — first 10 partner dApps in referral program

The ask: \$35K Walrus track prize + audit credits + partner-dApp intros.

Funds 6 months of runway to mainnet ship and the referral program.
